**CTS**

*Reimagining Connectivity*

# Securing Your Network. Empowering Your Vision.

## About Us.

---

Cenfra Telco Systems (CTS) brings you leading-edge solutions to create an agile and efficient physical infrastructure conducive to optimum data transmission. We are a US-based brand committed to designing, manufacturing and supporting the construction of cohesive networking and connectivity infrastructure solutions for home and commercial businesses.

Our resilience and commitment have helped us to forge a niche in the passive networking component market. As a global player, we have built a team of technical design experts, logistics partners, and supply chain vendors to provide our clients with tested high-performance and dependable connectivity solutions in Datacenter, Communication and Security Products. Our expertise lies in harnessing the power of Cloud Computing, bringing your vision to life with unparalleled precision.

## Our Corporate Values.

---

*Cenfra Telco Systems (CTS) is a brand built on the foundations of transparency, integrity, exceptional expertise and a customer-centric approach to provide solutions that stand the test of time.*

# Our Commitment.

Cenfra Telco Systems (CTS) is driven by a relentless commitment to providing unparalleled quality and reliability in every product we offer. We understand the critical role of seamless connectivity in today's fast-paced digital landscape, and our mission is to empower businesses and individuals with robust, future-ready solutions that ensure optimal performance and reliability.

## *Pioneering Tomorrow.*

---

In the IoT, blockchain, AI and data-driven innovation age, a robust network infrastructure serves as the backbone for seamless communication and information exchange. As we surge into the future, this foundation's reliability, efficiency and scalability will be paramount, ensuring a swift and secure passage for the torrents of data that propel the technological advancements yet to come and shape the course of progress.

Cenfra Telco Systems provides a comprehensive solution to these requirements, ensuring that data transmission is seamless, fast, and secure. We offer a flexible and organized approach to cabling, to provide you with a network infrastructure that is robust, dependable and future-proof. With our enterprise LAN and FTTx solutions, you can optimize your network infrastructure and be future-ready.

Tomorrow's Digital  
Infrastructure*

# Our Product Portfolio.

## ■ Intuitive Passive Infrastructure Solutions

Our dynamic spectrum of product line-up spans end-to-end structured cabling systems. From copper cables and accessories to fiber optic specialty cables, racks, enclosures, and complementary accessories, we deliver seamlessly converged datacom solutions.

Whether you operate in a small office or within the robust realm of data centers, from OEM wiring challenges to demanding industrial conditions, we confidently empower organizations to conquer both IT and OT hurdles across diverse industries and sectors.

## Copper Solutions

From high-speed Ethernet cables to advanced networking solutions, Cenfra Telco System's comprehensive suite of Cat 6, Cat 7, Cat 8 cables are designed and developed to meet all your diverse structured cabling, PoE connectivity demands.

Our copper range is well-complimented with all-inclusive cable management systems, accessories, modular connectors, presentation panels, and patching systems that provide reduced interference and smooth data transmission.

## Fiber Solutions

Dive into a world of limitless possibilities with high-speed and high-bandwidth fiber optic cables and accessories of Cenfra Telco Systems (CTS).

Whatever your application, indoor or outdoor, business or industrial use, our single-mode to multi-mode fiber type FO cables to space optimization patch panels, patching systems, conduits and pigtails, are designed to deliver performance even in the most demanding environment.

## Enabling Unlimited Possibilities

## ■ FTTx | Speciality Cables

Our versatile cable portfolio also has elevator cables for connectivity in elevators and co-axial cables designed for reliable outdoor connectivity. With precision-engineered audio and control instrumentation cables, we ensure seamless transmission and control across diverse applications.

Explore our comprehensive FTTx solutions range of drop cables, Micro/Mini ODF, cabinets, splitters, patch-free FDH and retractable cables all tested and approved by the service providers.

## ■ Cabinets | Racks | Enclosures

Cenfra Telco Systems (CTS) brand defines simplicity and efficiency in its products and the cable management solutions attest this fact. Efficient cable management is the backbone of seamless connectivity.

With CTS cabinets, racks, and enclosures, tangled wires become organized pathways, ensuring smooth operations and maximizing space utilization. Small or large network application, indoor or outdoor use, wall-mounted or free standing, compact or large capacity enclosure, CTS has a solution for your cable management woes.

## ■ Data Centers

Secure your data, applications and cloud networks in reliable and scalable infrastructure facilities that combine storage, power, ventilation, cooling, and space optimization into one cutting-edge solution.

Cenfra Telco Systems (CTS) offers you with edge, modular, micro-modular data center solutions that are uniquely designed to provide you with an infrastructure foundation that is flexible, robust, highly efficient and has a smaller footprint. From custom-designed to pre-fabricated solutions, we provide an agile network that can house your data interoperability needs.

## Managed Power

Maximising energy efficiency is a mission-critical function of any business. We offer you modular, mountable Power Distribution Units (PDU) with redundancy and surge protection features as well as Unlimited Power Supply (UPS) solutions in sturdy construction with different power capacities to help you streamline your energy management needs.

## Security Systems

Elevate security at your home or office with our advanced CCTV and access control cameras, offering round-the-clock surveillance and peace of mind. Monitor every corner with clarity and precision with our array of dome cameras, bullet cameras, thermal cameras and access control units and safeguard your premises against potential threats.

## CTS Comprehensive Product Range

Our products are designed to unlock the full potential of connectivity and how it can be synergized across markets and applications to bring your vision to life.

Copper & Fiber Solutions

Datacenter & Pre-terminated Solutions

Intelligent Solutions

FTTx Solutions

Cabinets, Enclosure & Accessories

Outside Plant Enclosures

PDUs, UPS & Accessories

AV & Security

# Smart Solutions. Smart Infrastructure.

Centra Telco Systems is paving the way for smarter, more connected buildings that prioritize sustainability, safety, and productivity. With PoE technology, CTS enables the seamless integration of various devices, such as security cameras, access controls, and lighting systems, into a single network, streamlining management and enhancing efficiency.

Additionally, our IP-connected devices empower building managers with real-time monitoring and control capabilities, allowing for proactive decision-making and optimized resource utilization.

## Intelligent Enterprises

Power Over Ethernet is the technology that enables low-voltage units to converge and communicate with each other facilitating an intelligent environment of IP connected devices. CTS offers PON Passive Optical LAN solutions that bring copper and fiber connectivity to buildings of any size

## Solutions for Smart Homes

Our innovative solutions are designed to create smart homes that are scalable and adaptable, meeting the demands of modern living. With a focus on integrating high-speed connectivity and secure networks, CTS enables residents to enjoy the benefits of smart technology, enhancing comfort, convenience, and safety in their homes with our PoE solutions.

## Solutions for the Healthcare Industry.

The healthcare sector faces distinct challenges requiring solution-oriented strategies, from regulatory compliance to cost reduction and patient record digitization. Achieving these goals hinges on a robust converged network infrastructure that ensures data security and enhances patient experiences and outcomes.

CTS offers a comprehensive range of wireless and wired network solutions, unlocking numerous IoT opportunities to support the evolving needs of the healthcare industry.

## Solutions for the Educational Industry.

Cenfra Telco Systems (CTS) cabling solutions are ideal for addressing the IT needs of the education sector, where technology plays a pivotal role. As technology revolutionizes teaching and learning, with personalized experiences and interactive classrooms becoming the norm, CTS offers tailored network infrastructure and AV systems to support these advancements.

Additionally, CTS solutions prioritize privacy and security, ensuring the ethical use of technology and protecting sensitive student data. By providing reliable and scalable solutions, CTS empowers educational institutions to fully leverage the potential of technology in the classroom.

## Solutions for Hospitality Industry.

High-speed connectivity has become a fundamental requirement in the hospitality industry to meet guest expectations, enhance guest satisfaction, maintain competitiveness, and support the integration of technology-driven innovations.

In Cenfra Telco Systems you have a partner that can deliver on the promises and solutions that meet the requirements.

## Solutions for the MOGP Industry.

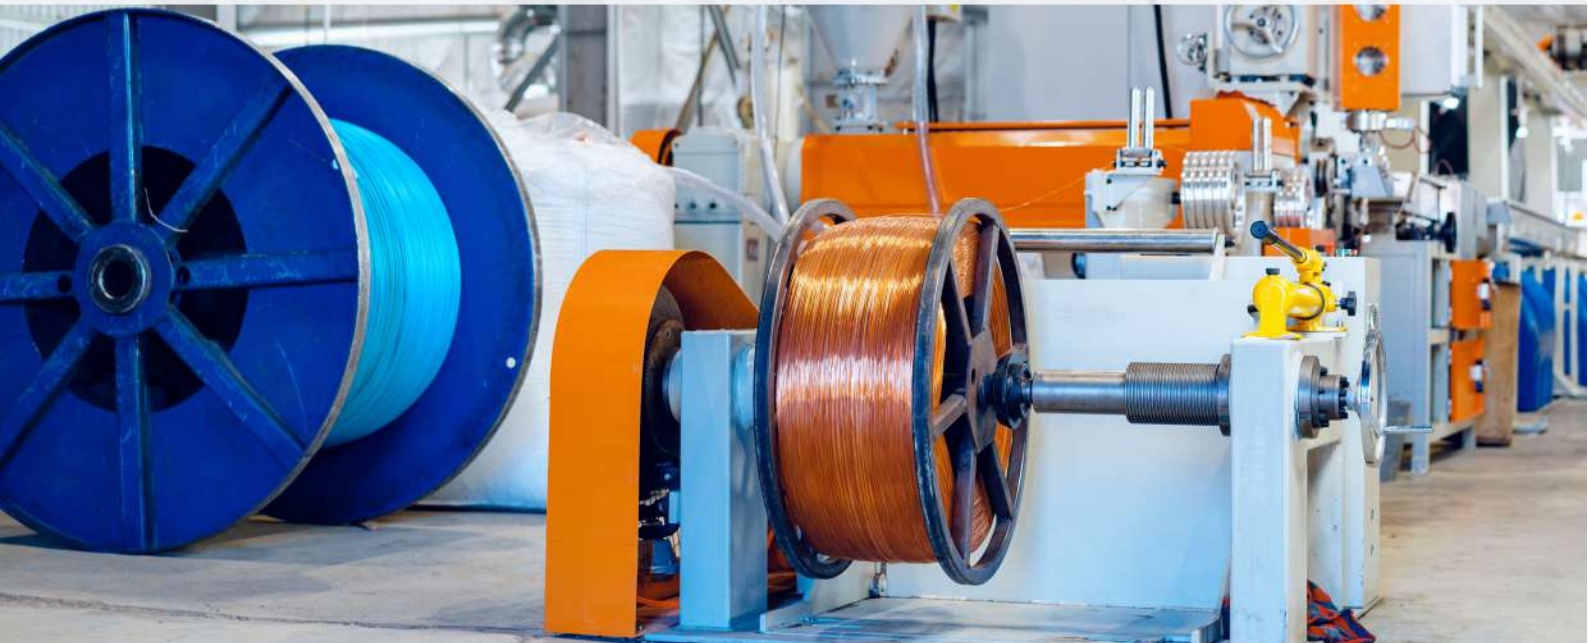

For offshore and onshore marine applications, we have unique cabling products that provide high resistance to solvents and are abrasion-resistant and ideal for subsea applications.

we support the MOGP industry with our complete ecosystem of passive infrastructure solutions with necessary compliance that are armoured, halogen-free, fire-resistant, flame-retardant, mud-resistant and can work efficiently and reliably in harsh environmental conditions to facilitate the streamlining of communication networks, support real-time data transmission for monitoring and control systems, and enhance overall operational efficiency.

# Innovation & Manufacturing Efficiency.

We strive to deliver value-based solutions and constantly pursue the tides of change instrumental in bringing on the technological advancements in product design, manufacturing and implementation. We understand that from faster data transmission to improved scalability, innovation revolutionizes connectivity solutions for the digital age.

Driven by our commitment to serve our customers and offer sustainable solutions we have invested considerable resources into research and development initiatives and always apply a customer-centric approach to innovation right from ideation to product development.

Our manufacturing facilities uphold the highest quality standards and optimize ethically sourced raw materials and processes in our production. Our products are manufactured in facilities that leave a small carbon footprint. We carry necessary stock at our warehouses to ply with the requirements of our clients.

## ■ Environmental Sustainability & Corporate Governance

Centra Telco Systems (CTS) prioritizes good corporate governance to maintain ethical conduct and transparency in all aspects of its operations. As a company, the owners and all stakeholders are so deeply committed to environmental sustainability, implementing measures to reduce its ecological impact and promote responsible use of natural resources. By upholding strict governance, sustainability standards and exercising transparency, CTS aims to fulfill its promise of ethical business practices and environmental stewardship.

## Quality Assurance

At Cenfra Telco Systems (CTS), our products are crafted with precision and expertise by a team of exceptionally talented experts and manufactured at facilities with ISO certification, ensuring excellence from design to delivery. Our products undergo thorough testing and certification by esteemed labs such as Intertek and Wimpy Laboratories.

With meticulous attention to detail, our dedicated professionals uphold the highest standards of quality, guaranteeing superior CTS products that exceed expectations.

## Product Performance & Warranty

Our cabling solutions, optimized for proven performance, are utilized in a variety of applications across diverse projects and markets.

As a testament to our products performance and reliability, Cenfra Telco Systems (CTS) solutions come with an extended system warranty. With the provision of 25-year limited performance warranty, customers can be assured that with CTS solutions, your system infrastructure is protected against disruptions and your interests are protected.

The warranty issued is applicable to published standards. CTS warranty applies to all installations executed by our accredited partners and warranties are issued upon the submission of test reports from the audit team.
